

19" DIN-Rail Mounting Kit

for iSwitch Systems

I Application

The Nexans 19" DIN-Rail Mounting Kit has been designed to integrate Nexans iSwitch systems in standard 19" racks. This mounting kit even meets the challenging demands of industrial, utility and military network applications.

It is a very modular, highly scalable and absolutely flexible system which allows users not only to integrate Nexans iSwitch Systems, but also other equipment with DIN-rail mounting clip into a 19" rack. As the height of the standard 19" DIN-rail mounting kit is 3HU only, it allows a maximum density of devices.

Other 4, 5 or 6 HU mounting kits with different colours are also available upon request. Each mounting kit comes with a cable management guide and a 32mm DIN-rail. The position of the DIN-rail (depth and height) can be changed individually in a very easy and comfortable way.

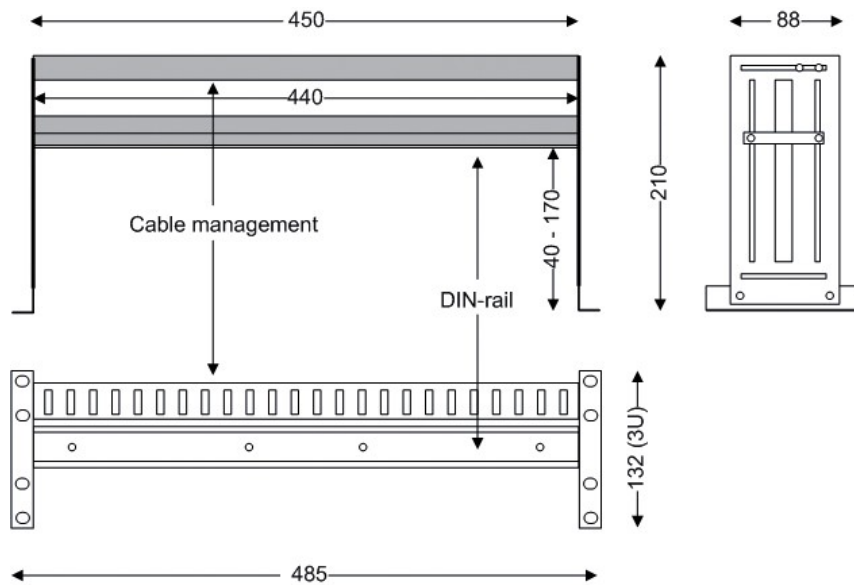

I Features

- very robust design
- metal version
- optimised strength-to-weight ratio
- 19 inch / 3HU
- flexible installation
- variable depth and height
- integrated DIN-rail
- integrated cable management guide
- designed for industrial applications

Technical Data

Construction	Metal
Dimension	485mm (W) x 132mm (H) x 210mm (D)
Weight	1400 g
Installation	19 inch rack

Mechanical Dimensions

Order Number

19" DIN-Rail Mounting Kit, 3HU, 49x132x21, metal	903537
